# INFERNO HYPER-GLOW

## BURNS LIKE HELL.

Venom INFERNO Hyper-Glow Technology is the brightest and longest burning glow available on the market. Period! This is Venom's own formula, and you won't find anything like it from anyone else. Compare the INFERNO Hyper-Glow to any glow paint or glow decal on the market and you will see that there is simply no contest. When we say it "glows 10x longer than paint"... we mean it.

### INFERNO HYPER-GLOW IS AVAILABLE IN SIX COLORS:

**GREEN**

Brightness : 10    Burn Time : 30-45 Min

**BLUE**

Brightness : 7    Burn Time : 30-45 Min

**RED**

Brightness : 5    Burn Time : 15-20 Min

**ORANGE**

Brightness : 7    Burn Time : 15-20 Min

**WHITE**

Brightness : 7    Burn Time : 30-45 Min

**GOLD**

Brightness : 5    Burn Time : 10-15 Min

# HYPER-GLOW 221 FLUTTER

## INFERNO 221 FLUTTER SPOONS

The MADE IN USA, Patented Venom INFERNO 221 RATTLING FLUTTER SPOONS are the most advanced flutter spoons ever designed. Two line attachment locations create two unique actions in the water, allowing the angler to adapt to lethargic fish or a more active bite. The INFERNO Hyper-Glow leaflets provide reusable, long lasting glow that the competition cannot match. The lightweight frame allows for life-like fluttering action and the Venom METALLICS Coatings give maximum reflection of natural light. All models contain a metal internal rattle.

### AVAILABLE COLOR COMBINATIONS:

# **HYPER-GLOW CORE 360**

## **INFERNO CORE 360 TUNGSTEN SPOONS**

The **PATENTED** Venom INFERNO CORE 360 RATTLING TUNGSTEN SPOONS emit light in 360 degrees so they can be seen from any direction. The INFERNO Hyper-Glow leaflets make the CORE 360 Spoons the brightest Glow-in-the-Dark fishing spoons on the market.

The tungsten frame adds weight and structure, while the Venom METALLICS Coatings lend vibrant color and unbeatable light reflection. All models contain a metal internal rattle.

# HYPER-GLOW TUNGSTEN MINNOW

## INFERNO CORE TUNGSTEN MINNOWS

The Patented Venom INFERNO TUNGSTEN CORE MINNOWS utilize the Venom INFERNO Hyper-Glow Technology to produce the brightest and longest lasting glow-in-the-dark jigs on the market. A Tungsten center core gives the dense weight that anglers demand. The INFERNO shell encapsulates the core, creating an unstoppable glow jig.

# NITE•LITE UV FLASHLIGHT

## NITE•LITE FLASHLIGHT

The Venom UV NITE•LITE has rapidly become the industry's go-to UV light. This powerful UV LED is designed to optimally charge Venom INFERNO Hyper-Glow products as well as other glow lures.

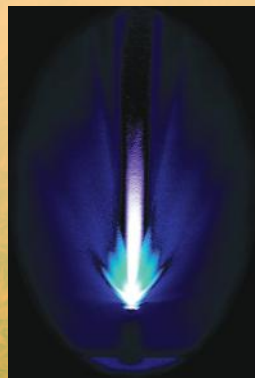

With the unique ZOOM feature, this UV light can be focused to a tight beam and charge glow components from an impressive distance. What does that mean for an angler?

A Venom Glow Float can be charged while still in the water so you have less downtime. Glow jigs or spoons only have to be lifted to the top of the water to be recharged. No need to have them in hand, contaminating them with human scent.

The Venom NITE•LITE comes with a AA DURACELL battery.

Zoom In

**MSRP \$11.99**

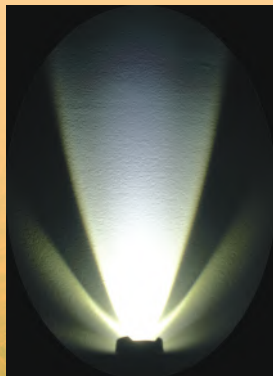

# WITE • LITE FLASHLIGHT

## WITE • LITE FLASHLIGHT

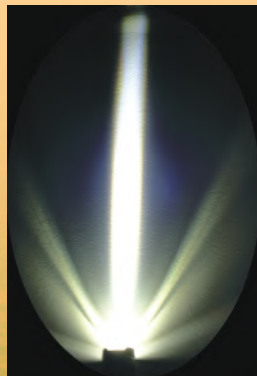

The Venom WITE • LITE is a conveniently small yet astonishingly bright SMD LED Flash Light. Shining with 100 lumens, this little powerhouse is the perfect pocket light for any outdoorsman at a great price.

The ZOOM feature allows the light to be focused into a tight beam to illuminate objects in the distance.

The Venom WITE • LITE comes with a AA DURACELL battery.

**MSRP \$11.99**

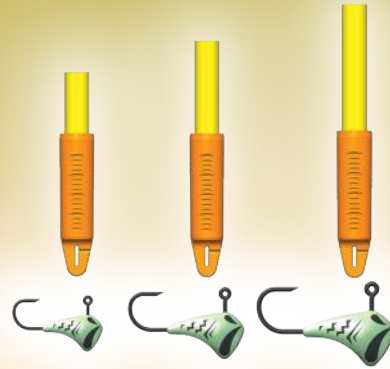

# ADJUSTABLE FOAM FLOATS

## VENOM ADJUSTABLE FLOATS

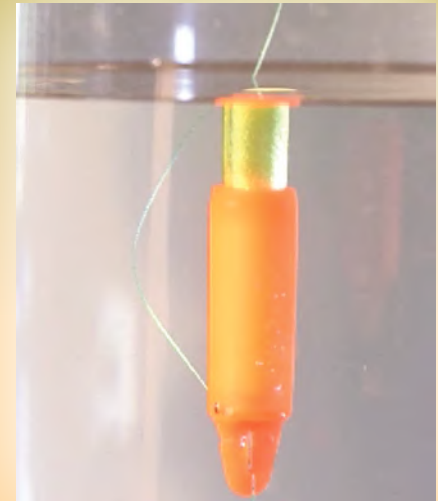

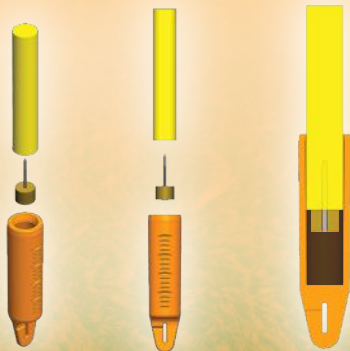

Venom Floats are the only truly adjustable foam float. By sliding the foam up or down, the buoyancy can be changed to adapt for different size jigs.

The adjustment is seamless within a given weight range. One float can achieve neutral buoyancy with every jig within the adjustment range.

A smaller float for smaller jigs... a larger float for larger jigs.

Included with each bobbers is a Venom Pin-on-Weight. This little weight can spear into the bottom of the foam, keeping the float upright so it can be set to neutral buoyancy with tiny jigs even without using a sinker.

Venom Floats can be set at exact neutral buoyancy, creating minimal resistance for finicky fish and light bites.

The Venom Float is a slip float. Cutting the molded notch will make the float snap on and off the line.

## AVAILABLE MODELS:

### DAYTIME KITS

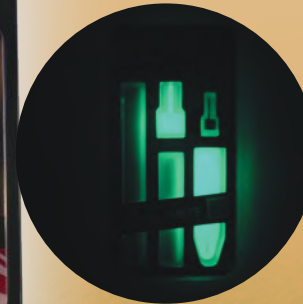

Hi-Vis floats made for general use with familiar yellow foam.

### PINK RIBBON KITS

The deep color contrasts with the bright ice and snow, giving increased visibility for anyone who wants it.

### NITE·BITE GLOW KITS

With glow times outlasting any existing paint or decal, your float will stay glowing long after your jig is dead - unless, of course, you are using Venom INFERNO Hyper-Glow jigs or spoons...

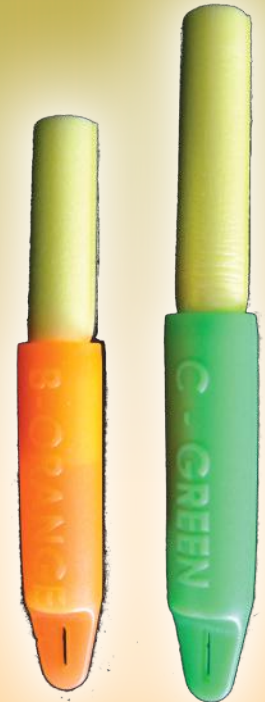

## AVAILABLE SIZES:

### B Size:

For small to medium sized jigs. Recommended for Pan- Fish and small Walleye presentations.

### C Size:

For large jigs and minnows. Designed mainly for larger Walleye presentations.
